Specifications for a friction feeder Apex Automate

Product sizes	:	Minimum 50mm x 50mm Maximum A4
Paper thickness	:	Mini. 110 g/m ²

We draw your attention to the following points:

- Foldings must be accurate.
- Items should not be stuck together.
- Delivery of items lying must be flat, no hooping.
- Items in flow-pack sachets: please refer to us about position of soldering (film of 40 micron thickness is OK- maximum space to be left between the film and article: 4 mm).
- The flow-wrap sachets must be correctly sealed.
- Pages of leaflets must not be attached with staples.

To ensure properly the placing of leaflets into packs, the sample must not be over 2/3 of the length of the pack. Example: pack of 210mm = leaflet of maxi 140mm.
